

Sample USTR Comments

I am the xxxxxx of xxxxxx, a business based in xxxxxx and I am contacting you in regards to the List 4 tariffs on US goods produced in China. We are a company that produces xxxx , which are included on the tariff list.

We employ xxxx people in the United States and produce many of our products in China with factory partners that understand the complexities of our product line. Here are the products and HTS codes of the products of our concern:

(list products and HTS codes here)

These products are core to my business and I am deeply concerned about the impacts that these punitive tariffs will have on my business and the local jobs we support.

The 25% tariff, with an implementation on short notice, puts an undue burden on our business and will result in raised prices to consumers, driving a decline in spending, which will ripple across our industry, resulting in lost jobs and potentially closed businesses.

It is widely known that these tariffs are instead a tax, impacting US consumers the most. I urge you to continue constructive conversations with China instead of imposing these tariffs on American businesses and consumers.

Thank you for your consideration.
